

VIDEO GAME CREATION WORKSHOP

(Year 5-10/4th-9th Grade)

Description

During this class, students discover the basics of video game creation using a game engine. They follow ever increasingly complex programmes in order to understand how to create different levels, characters and how to manage animation etc. They will also learn the basics of programming. As the course continues, students will be given more opportunity to create independently in order to improve their games and imagine new ones.

Activities

- Understanding the software
- 3D modelling
- Creation of levels
- Managing different aspects of the game
- Learning to programme
- Creating animation
- Developing an independent project

Organisation The workshop is given by an experienced teacher.
It takes place on Mondays from 4pm to 5pm or Wednesdays from 1:05pm to 2:55pm. *

Fees Participation costs 330 Swiss francs per term
This includes access to a computer during the workshop.

*The lycée reserves the right to change the times at the start of the school year.
